My team is interested in participating in the upcoming event for the first time yes no

I'm interested in starting a team but need more information. yes no

ZERO LANDFILL EVENT...

We are very proud to coordinate a green event each year leaving the competition with zero waste. All participants gladly follow along at our recycling station where the refuse is separated. A local farmer takes the compost and we recycle or recover energy from the rest.

WHO WE ARE...

The Nassau and Suffolk County Soil & Water Conservation Districts coordinate the Long Island Regional Envirothon in collaboration with the United States Department of Agriculture - Natural Resources Conservation Service and the New York State Department of Environmental Conservation.

OUR SPONSORS...

Thank you to our generous sponsors: Covanta, New York Power Authority, Usdan Summer Camp for the Arts, and Nassau County Parks who have provided the funding and/or resources to make this event possible.

Students at the oral presentation station during the 2016 L.I. Envirothon held at the Usdan Summer Camp for the Arts in Wheatley Heights.

Technology to Feed the World"**

The 2016 Suffolk team from Sachem North H.S. competing at the NYS Envirothon in Geneva, N.Y.

HOW IT STARTED...

The L.I. Envirothon is the local component of the New York State and North American Envirothons. It all began in Pennsylvania in 1979, then known as the Environmental Olympics, originating as a tool for assisting teachers in integrating environmental studies into their science curriculums. Its popularity quickly grew, developing into an international event with more states becoming involved each year. New York State held its first Envirothon in 1990 and Long Island joined the excitement in 1999.

Today, most of the United States and Canadian provinces participate in the North American Envirothon, reaching more than 500,000 students annually. Thanks to dedicated volunteers, enthusiastic students, devoted teachers, and generous supporters, the Envirothon continues to promote environmental studies in our schools.

WHAT IS AN ENVIROTHON?

The Envirothon is an environmental studies competition for high school students. It is based on five subject areas: aquatics, forestry, soils, wildlife, and the current issue - which changes annually. In past years, the current issue has covered topics such as: agricultural preservation, invasive species, non-point source pollution, wildlife management, wetlands, etc.

A “Stationmaster” manages each of the subject areas. These dedicated professionals oversee all aspects for their area of expertise. They approve the learning objectives, reference lists and study guides that are recommended by the New York State Envirothon Committee. In addition, they are responsible for developing the exams and supervising their “Station” during the competition.

Students working in the soil pit during the 2015 L.I. Envirothon held at the Old Bethpage Village Restoration.

On the day of the competition, the students rotate between the subject stations and answer questions as a team. Each subject area test is made up of 25 multiple-choice questions. Many of the questions are hands-on, involving the use of equipment, maps, and/or audio/visual devices.

A sixth category, the oral presentation, is devoted to the current issue. The students are given an environmental scenario, which is posted on our website (www.LIEnvirothon.org) in February. They are required to prepare a solution as a team and present their results to a panel of judges, who score the presentations.

WHY?

The Envirothon committee has carefully developed the program’s learning objectives. They correlate with the New York State Department of Education’s “Learning Standards” in the areas of Mathematics, Science and Technology, Social Studies, and English Language Arts. With the educational tools provided, students aspire to an advanced level of understanding about their natural surroundings. They reveal their knowledge through utilization of their research and evaluation abilities, while expanding their decision making and problem solving skills.

WHO CAN PARTICIPATE?

All high schools in Nassau and Suffolk Counties are eligible to participate by registering one or two 5-member teams. All students from the two top scoring teams (one from Nassau & one from Suffolk) each receive a \$500 scholarship, and paid registration and transportation to compete in the New York State Envirothon in May. All participating students and their teachers receive an event memento and recognition for their participation. Registration deadline is April 1st.

The 2016 Nassau team from Great Neck H.S. South at the NYS Envirothon. They placed fifth overall!
